Interview Summary - isolated warehouse type building
 with heavy black, slick, & cold equipment. Equipment
 is unimpaired. It is fragile, has calibrated
 digital & analog. The equipment is moved / stored
 in large wooden crates. The most prominent
 people wear brown uniform type clothing
 with red & gold markings and are perceived
 to be in charge - direct movement to transportation
 conveyances of equipment. Assembly is associated with
 the building - An push-like separate pieces are
 received from various sources, assembled and
 then moved to deployment site.
