SECTION II

This section deals exclusively with the accuracy of the
information provided, not its usefulness. Responses are scaled
from 0-3 utilizing the following explanatory criteria. If a
source has not addressed a particular item then select UNKNOWN.
If a source describes an item which cannot be verified then
select CANNOT BE DETERMINED.

    0 - Little or no correspondence with known or suspected
    components of the target site.

    1 - Evidence that the proper target site is being described,
    however the information contains a mixture of correct and
    incorrect elements.

    2 - Good site correspondence with several items recognizable
    or confirmatory in nature but some incorrect or irrelevant
    information is reported.

    3 - Good correspondence with the target with unambiguous and
    unique information and relatively little known incorrect
    information.
