electric plant

4 1/2 - a very large device/machinery. It either produces or requires a lot of electrical energy. The people I have perceived so far are technician/maintenance type personnel. Their job is to keep things running smoothly.

Site consists of a structure that has angles and is curved/domed. Inside the structure cool, grey, concrete. Point ① is round, curving, arched, hard rough rock. Point ② is lighted.... pale yellowish green. It is round, circular, horizontal and empty. Point ③ is round, rounded... horizontal and vertical aspects here. There is a very large device that is grey, square/rectangular that either produces or uses large amounts of electrical power. There are people here that have the job of keeping this device running smoothly. Point ④... sounds of clanging, banging. ⑤ doorway, steel, people here are off-duty relaxing.
