PROJECT SUN STREAK (U)

Session Procedures Report

FORMAT

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Control Number: 'OTHER D'

Nickname:

Date of Session: 9 JUL 86

Target Country:

References:

Session Number: 3

Date of Report: 17 JUL 86

Mission Status:

Technique Utilized: CRV

Source Identifier: RV-003

1. (S/NF/SK) TASKING: Same as session #1

*miss 099*

2. (S/NF/SK) SESSION: Source ~~described~~ described what was probably the same 'petroleum storage' 'underground petroleum storage area' as described in session #2, but may have actually been ~~at~~ at ~~the~~ target site.

3. (S/NF/SK) Summary: (Large, vertical, round, smooth, grey structure located 2km to the NW). Target is a very wide, long, broad structure in a large, open, semi-restricted area. This structure may be coated with a protective, black, tacky substance 'like tar'. The structure is constructed with a thin, hard, metal casing, under which is a spongy, composite material 'like high-tech insulation', then an area of empty space, then a supporting structural framework, then a huge, mostly empty volume of space which smells very strong and pungent. This volume is only partly filled with a fluid that is not necessarily beneficial to biological systems, but is used for something. It is extracted from one end of the structure through a long, thin, round thing (pipe?).

then is loaded into something that transports it to where it is distributed, portioned, and packaged.

4. (S/NK/SK) FEEDBACK: Ops officer opined that source-provided info was not satisfying the 'intelligence question'. Amplifying tasking instructions were provided so that source could be run ~~over~~ ~~type~~ ~~again~~ against target yet again.
