battle plans

Site is a land/water interface with what is perceived as a bridge-like structure and other structures. There is a large concrete building at the site. Inside, there are pungent chemical odors, the sound of heavy equipment moving about, and echoes produced because of the size of the building. There are cylindrical, <sup>metal</sup> ~~metal~~ <sup>unwieldy</sup> and heavy. There ~~are~~ <sup>are</sup> also tracked vehicles. Ambience of building suggests preparation for invasion activity. It is ~~often~~ perceived as a warehouse-type building used to stockpile equipment. There are also long, silver cold smooth cylindrical objects (separate from those described above) that produce a sensation of ~~being~~ <sup>being</sup> ~~in~~ <sup>in</sup> ~~the~~ <sup>the</sup> ~~air~~ <sup>air</sup> ~~like~~ <sup>like</sup> ~~projectiles~~ <sup>projectiles</sup> (aircraft missiles).
