Site is a populated area, but building of interest is isolated not because of location but because of access. Strong impression of a vehicle pulling up in front of building and 2 people friendly taking a third person into the bldg. At a later point in time, a large group of people (international / military, civilian, diplomatic + press) entering bldg. and waiting to have credentials checked by a uniformed man sitting behind a desk. Purpose of gathering is a press-type meeting designed to cover-up true circumstances surrounding the disappearance of the first person in order to avoid international repercussions.
