Interim Summary. Object is ~~not~~ near water. It
 turns if feet as if it is actually on water.
 It is long, narrow + flat-bottomed.
 It is metallic w/ metal construction. It
 has a controlled environment - artificially
 lighted to simulate day/night, constant
 temperature, controlled air. Object is
 mobile, but not independently. Requires
 hook-up to another Object in order to
 be moved or re-located. There is
 a research/testing chamber to
 Object. There is a ping-pong sound-like
 sounds emanating off other Objects (Airbus-
 like/some concept). There are flexible
 hoses going to the Object. From beneath
 there is a recessed square trans panel
 window/plate. It is dark inside with

waves of light refraction.

Additional data - next page

Objekt has temporary wheels for mobility, hydraulic
action, solid short metal plate front-end,
a ramp on the side with a walkway the
length of Objekt. There is a smaller Objekt
adjacent to the primary that seems to
be a source of power. Sensitive-like.

~~None~~
