

SRV 11 Dec 86

Sorry- have tried all week and
can't look me to anything.

SRV 11 DECEMBER 1986

Paul

The following perceptions were received:

Large, long, black, rounded, elongated, tapered objects horizontal on a surface.

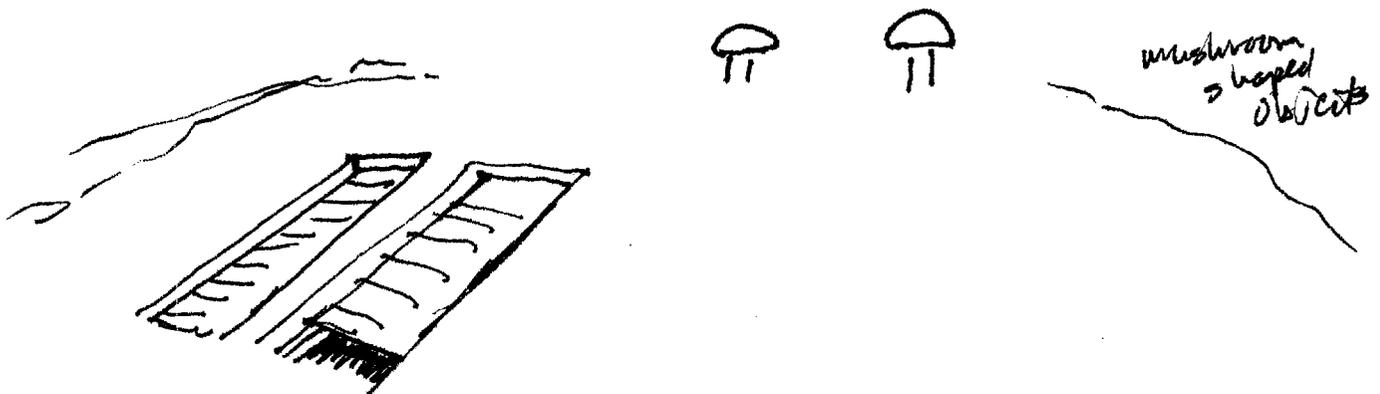

Male person standing next to circular water. Amused expression on his face, but EI of unamused. Area is an exclusive "ritzy" area with lots of manicured, potted, cultivated vegetation.

Deep canyon/cove, with sheer, rugged rocky walls; seething green-blue water a long ways down.

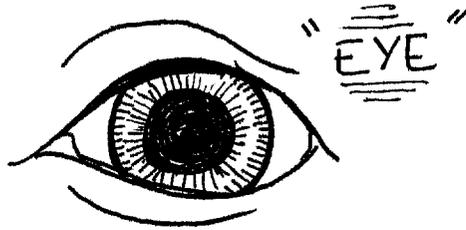

Round, hollow metallic object w/corrugated sides; reminds of garbage can on side.

Group of people moving along in low tropically vegetated, hilly area, light clothes, spanish/mixed (i.e., Philipino/latin American), involved in some sort of clandestine activity. It's cohesive group whose existence is little known about outside the group. @ person has a different assignment in an overall plan. Male and female. Red or black sashes.

Underground mound or facility with sloping sliding doors w/lines in them.

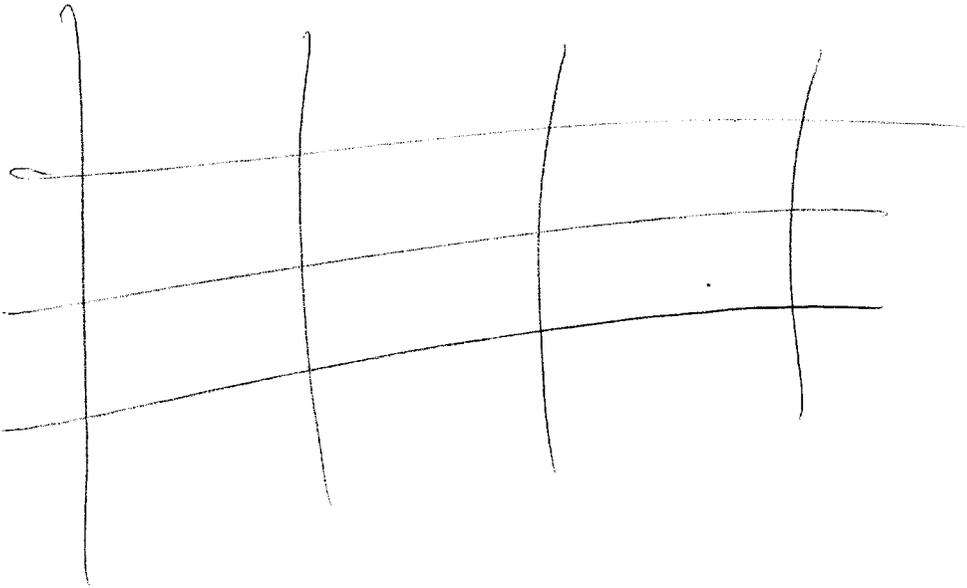

Impression of a huge eyeball in front
of my face
