

SRV
Ft Meade
21 August 87

SUBJECT: Results of SRV sessions for week of 17-21 August, 1987.

1. TARGET: The target was to describe the picture on the cover of the 31 August 87 issue of Newsweek Magazine.

2. SESSIONS: Only one session was held this week, due to other involvements. This session used the standard CRV method.

3. RESULTS: There is a recurrent impression of a curved, bumpy (possibly segmented) section comprising the main focal point of the picture. Inside this curved area, the surface is depressed below the "bumps", but is flat. The general colors are dark; mostly blue and black. The central area is brighter than the surrounding area; the surroundings being in almost total darkness. There is a recurrent impression that this is an underwater scene, possibly the Titanic.

4. RVer's CRITIQUE: Who the hell knows? We'll see.
