WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

DT-S

18 June 1987

MEMORANDUM FOR RECORD

SUBJECT: Utility Assessment Project "P" (U)

1. (U) Each week the popular magazine, "NEWSWEEK" has a different cover. Some weeks this cover is an individual and on others it is an action shot or a photo of some pertinent news item.
2. (U) This magazine is issued ca. Wednesday of the week covered, that is to say, for a week beginning with Monday the first and ending on Friday the fifth, the reader could expect to see the copy of Newsweek for the period 1-5 on the newsstands on or about the third. The news, of course, will deal predominantly with information occurring on the previous week. The decision on what goes on the cover, corporately at Newsweek, is actually decided very early in the previous week which, of course, sometimes causes the reader to feel cheated by the lack of coverage on events which may have occurred in the latter portion of the week. Such is the age of rapid communications.
3. (S/NF/SK) Given our 1-5 scenario, by the fourth, (Thursday), provide a summary and sketch of data you perceive for the magazine to be issued two weeks hence. This will preclude inadvertent accessing of the decision on the cover made at corporate headquarters and not, as expected, accessing the future cover. That means that in our scenario of 1-5, your responses will be concerned with the cover that is expected to be issued during the week of 15-20, skipping over the week just following.
4. (S/NF/SK) You will be reminded on Monday of each week of the tasking and the dates involved. Your results, as before, are due four days later, (on Thursday), by close of business. It is requested that you provide a summary and a sketch of your perceptions on that day.

Good Viewing
