S.S. ACTIONS REQUIRED:

1. EVALUATIONS:

- complete all ops, UTIC. assessments, other...
- assess relevance, significance, implications, reliability, qualities...
- Set of procedures to facilitate future evaluations
- Develop criteria for ops status, CIM status, etc.
- Refine evaluation methodologies, procedures.
- ident. future needs.

2. OPERATIONAL TASK INTERFACE:

- Activate IC. task coord/review group on regular basis
- Increase internal DIA involvement (select mem., struct need-to-know)
- Develop comprehensive set of ops, UTIC. assess, other. (ods etc.).

3. TECHNICAL ISSUES / TECHNICAL INTERFACE:

- INCORP. world-wide research findings, esp. SRI... , as appropriate/possible.
- maintain strong real-time link with SRI / SGRD R/D...
 - Joint projects (dist effort, other)
- Revise Tech reports...
- Report Tech (ops?) limitations
- ident(?) key variables (from ops data, from R/D...)
- eval. the targeting issue (what/who is being assessed? How to improve contact)
 - env?

3. TECH ISSUES / INTERFACE, CTD:

- Review clear def. of objectives, qualifications. what % rel. can be expected, why? use of res., etc.
-

4. Protect / PROGRAM ISSUES:

- Screen / select at DIA, elsewhere (rev. cautious procedure... steps... involve with SRI "Test")
 - How to? Rev. Plan procedure -
- Identify candidate people
 - questions...
 - interviews...
- Review manuscript 'Test' / selecting target tasks / procedures.
- Review overall protocol, procedure (review, improve)
- Review clear definition of "needs" (what should S.S. try to achieve, accept as tasks...?)
- Staffing issues
 - keep eye open for pot. difficulties
 - anal. group balance
 - teamwork with prev. members..
 - Review new possibilities..
 - mental requirements

50 DEVELOP NEW CAPABILITIES

- in conj with STR /SGRP (??)
- CANDIDATE TASKS/PROJECTS
 - SEARCH (Refine) -- ANALYTICS? / SCALING? / ?
 - PRE-COG.!
 - R.A.(?)
 - TIF usage: (no, for disrupt eval,)
