Task/Target No. : 92-105-0  
Session No. : 04

B. PERSONNEL DATA:

Source No. : 049  
Monitor's No. : NA  
Beacon/Sender No. : NA

C. SESSION DATA:

Date Task Received : 1 OCT 92  
Session Date : 2 OCT 92  
    Start Time : 1045  
    Stop Time : 1208  
Method Used : ERV  
Aids/Distractions (PIs) : Sinuses; death of rabbit  
Pre-session Hunches (AVs) : None  
Date Summary Returned : 2 OCT 92

D. EVALUATION DATA:

Viewer's Estimate :  
Evaluator's Estimate :

E. SESSION SUMMARY:

SG1A

I could perceive absolutely nothing about the [REDACTED] No. 1. It was as if I were trying to peer through a thick, dark gray cloud or mist. There was no sense of life, no movement; just this impenetrable cloud. I did manage not to sneeze a single time during the session and I felt completely detached from my physical body. My arms and legs did not exist and I felt no pressure downward on the bed.

TASKING SHEET

SOURCE NO: 049

DATE: 1 OCT 92

SUSPENSE: 2 OCT 92

1200 hrs

1. PROJECT NUMBER: 92-105-0

2. METHOD/TECHNIQUE: Method of choice.

3. BACKGROUND:

---- Your last session, Session 03, is dated 23 Sep 92.

SG1A ---- On 29 September 1992, JTF-4 confirmed that the suspect vessel  
identified as [REDACTED] had arrived [REDACTED] SG1A  
SG1A [REDACTED]

4.  
ESSENTIAL ELEMENTS OF INFORMATION:

SG1A  
----If the [REDACTED] No 1 has left port, then determine its current location.

----Determine if the target vessel is carrying contraband in the form of illegal drugs:

o If so, describe how the drugs are packaged (wrapped) and where they are stored aboard ship.

---- What are the intermediate and final destinations of the vessel's contraband. Identify possible rendezvous points, if any.

5. COMMENTS:

Pre-session Hunches (AVs) : None  
Date Summary Returned : 24 SEP 92

D. EVALUATION DATA:

Viewer's Estimate : low  
Evaluator's Estimate :

E. SESSION SUMMARY:

The suspect vessel will be found at either:

1) 78 35.5 W 5 3 N or

2) 78 32 W 5 1 N

This location is approximately 70 miles west of BAJO BAUDO'.

Viewer's Estimate :  
Evaluator's Estimate :

E. SESSION SUMMARY:

Suspect vessel is beginning to move towards planned meeting or off loading location. It is very dark around the vessel. The water appears almost black. The off loading location is associated with, or has, the following features: 1) some sort of cages associated with shellfish or crabs (processing or collection facility) 2) location has cranes or "carriers" (lifts) on large rollers or treads reminiscent of a tank 3) one engine sea planes are based here (on floats) 4) phonetics include BLANCO, PIANCO, PARCO, PACQUE and PARCITO. The current cargo of [REDACTED] is associated with petroleum or drilling related parts; images of large winches or motors. SG1A

Suspect vessel started WSW from canal, is making a counter clockwise loop of sorts. It has, or will be, been passed by a very large military vessel; like a battleship or cruiser. Impression is the north or north-central portion of the west coast of Columbia. It will loiter around in a CCW circle for a short time. (NOTE: the large military vessel is somehow associated with the port; either namesake, occasional stop overs, basing area or repairs; it is somehow associated with port facilities.

Will have contact with a sleek, white with blue lines vessel. This 2d vessel is associated with sports or recreational orientation. The bow has extreme angled features. Suspect vessel will be associated with stacks of bowl shaped objects which "feel" wooden. A door leading to an old storage area under the super

2)

structure section of suspect vessel is important (starboard side).

The suspect vessel will be associated with ice and large "bodies" of something (long, slimy, round) reminiscent of squids or "produce".

SG1A [REDACTED] will rendezvous with another vessel. There will be a transfer of objects at sea, but not too far from a shoreline. The water is shallow here. The transfer will involve long tubular objects as well as crates or boxes. This transfer will be from a much larger vessel (starboard side). Boxes will contain bowl shaped objects previously mentioned. These objects, in turn, will contain numerous smaller objects. Movement is associated with these smaller objects. Metal tubes or cylinders will be transferred.

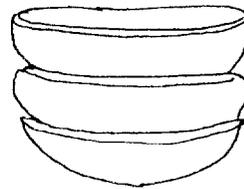

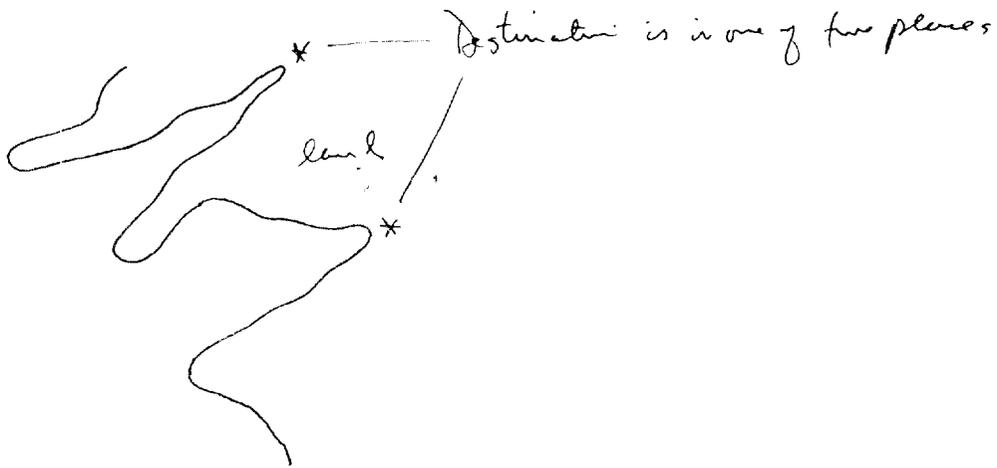

The vehicles on the beach are associated with lights, lighting up of lightening. They are associated with bright, periodic flashes of light. Impression is that they are used for signalling someone or something. ISADORA is another ship. However, the name flip-flops between sleek white "sports" vessel and larger vessel. The lifting of large, tube like objects from a large vessel to a smaller one is perceived. Concept of "one per boat". Resulted from "Port Everglades" cue. Objects are placed into hold at an angle.

Concept of a thick substance reminiscent of cake batter being "poured" over numerous white, angular objects like angular bottles.

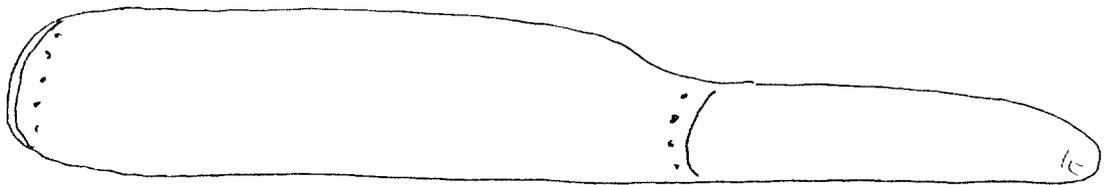

Suspect vessel is involved with illegal activity. Intention is to sneak something back.

SG1A

They have the wrong ship. The [REDACTED] is currently passing through a narrow corridor reminiscent of a canal. However, the name "ISADORA" was perceived as associated with this vessel in some manner. There is a large black object (looks like a bracket) on top of the vessel. There is an exaggerated feature on the bottom, an addition to the normal configuration. It is also missing a portion of its stern, like a big hole in the hull.

There are a series of upright cylinder canisters banded together into groups of 3x4 or 4x4 by two heavy bands. The feeling is that the suspect vessel is on the "up & up" right now. However, it has been dirty in the past.

Two people are talking below deck; a woman to a man. The man is heavy set, white "tank top" t-shirt, unshaven and missing some front teeth. He is worried about a time schedule. She is telling him that there is trouble, or rather a troublesome situation is about to develop.

Other unrelated concepts are: 1) a small case with batteries in one half (there are more batteries present than what is "necessary" 2) some individuals on board are "strung out" or heavy users 3) there is a long, square object of mottled color within a fish 4) there are a number of vehicles on a hard packed smooth beach. Phonetics are PELLIGRO and SAN PEDRO. The destination is not on the map provided. The vessel will head NNW is not already.

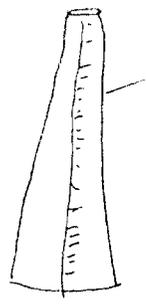

Bag of something  
are "under" green  
covering.
