

SESSION INFORMATION

A. TARGET DATA:

Task/Target No. : 92-78-B
Session No. : 01

B. PERSONNEL DATA:

Source No. : 049
Monitor's No. : NA
Beacon/Sender No. : NA

C. SESSION DATA:

Date Task Received : 27 JUL 92
Session Date : "
Start Time : 1354
Stop Time : 1430
Method Used : CRV
Aids/Distractions (PIs) : Same ole' stuff
Pre-session Hunches (AVs) : None
Date Summary Returned : 27 JUL 92

D. EVALUATION DATA:

Viewer's Estimate :
Evaluator's Estimate :

E. SESSION SUMMARY:

Aspects of the target have an association with the radiation of some sort of matter or energy-like substance. There are flecks of light, bolts or lightning-like bursts of visible "energy" and a recurring concept of spinning motion. There are numerous sharp angles. The sides or planes made by these angles are faceted and smooth and shiny.

There is a muddy dirt road near the target which has standing pools of water in the ruts. There is an alignment of panel- or storage-type trucks or vehicles. One aspect of the target feels closed-in. An individual is pulling on a wire or a string. A different type of vehicle is moving upwards at a slant. There is a padded "box" associated with figure ii(a).

Figure ii(b) is associated in some way with the concept of "barrier". This diagram produced a sharp pain in the very crown of my head.

Figure iii(c) is associated with the following narrative. It's reminiscent of looking inside of a hollow thunder storm cloud; a large chamber or cavity. It is blue/black and shiny. There are flashes of light and energy which appear to streak or burst across the opposite "wall" or side. A central figure/object appears suspended. There are entire "walls" of pulsating, flashing brilliant light. It produces an extremely invigorating feeling or emotion within oneself. There is also a phenomenon within this feature which appears as a release of shinning, shimmering particles which are reminiscent of silver-like bubbles in water.

Top portion or
feature of a larger
object; blue-black;
shiny; smooth;
precise angles to
sides; the front
or top feature to
a larger object

path or walkway on top
of elevated structure

very
tall

ii)

Coursed layers / levels

Umbrella-like feature, descends; has faceted, crystalline object which suspends from the center; flecks of light, pulsating; glows associated with inside of "umbrella".

Membrane-like structure reminiscent of a bat's wing.

crystalline object suspended from center

③ Descriptive of interior is narrative; outside is log, faceted sides; central cone, hole of undetermined purpose.

TASKING SHEET

SOURCE NO: 049

DATE: 27 Jul 92

SUSPENSE: 27 Jul 92
1600 HRS

PROJECT NUMBER: 92-78-B

METHOD/TECHNIQUE: Method of Choice.

. BACKGROUND: Two witting DIA travelers acted as beacons on Sunday, 26 July 1992. Copies of photographs of the beacon persons are made available for your use/information.

1. ESSENTIAL ELEMENTS OF INFORMATION:

----Describe the key features of the single selected target visited and observed by the beacon persons on Sunday, 26 July 1992.

----Describe the immediate surroundings of the beacon persons while they are on target.

----Submit sketches in support of your findings.

5. COMMENTS: Optional Coordinates: 430918/624118.

SG1J

BEACON PERSONS

PROJECT: 92-78-B

DATE OF BEACON ACTIVITY ON TARGET: 26 JUL 92

DATE OF SESSIONS: 27 JUL 92

SOURCE 025:

----The target is a large structure characterized by the presence of a triangular peak positioned at the top of the building.

----The structure resembles a tower and if can be dangerous.

SOURCE 049:

----The target involves the presence of a radiation type activity.-

----The presence of vehicles (trucks) was perceived s being associated with the target.

SOURCE 079:

----The target is a natural setting with two small structures sitting close together.

----There was the presence of a circular object (not further defined).

----The target appeared to have historical significance.

----Liquid (water) is present. There is the presence of brown tubular objects and the discernible activity of fast motion.

----Vehicles are or could be there.

GENERAL SUMMARY:

There is insufficient correlation in source reporting to arrive at a general consensus of the target. Source summaries must be read individually to determine coorelation to the beacon target.
