- E. SESSION SUMMARY:

The target contains both relatively still as well as rapidly moving water. There is lush vegetation reminiscent of a tropical or sub-tropical location. There is the impression of a bluish colored cube of unknown material with very sharp and defined corners and edges. It appears to float or hover in space. This is reminiscent of a super conducting experiment. There is a yellowish glow behind the cube, causing it to appear in silhouette.

Another object is flat with rounded corners. It is brown and has a textured surface. There is a jumble of unrelated machine pieces or parts that are rusty. There are objects in alignment reminiscent of two-person seats. There is a flavor of entertainment here. There is an empty pool with stepped sides.

There are groups of people reminiscent of families walking around. It is warm, sunny and clear. It is a location where violent storms/weather occur without warning; Powerful movement of water, air and pieces of soil.

There is an historic aspect to the target; a feeling of "settlement" from the 1700's. It's history, popularity, population, emphasis, importance and utilization has been grown and waned since its inception. The historical aspect is strong but there is also the entertainment portion of the target as well.
