Summary of Information

The target contains predominately one structure which is on an interface of water and land. One feature consists a set of parallel lines. These are reminiscent of railroad tracks. Another feature has hard sides, contains water and has a high area along one side. It is very green here and the air is heavy with a sense of having recently been "freshened". The words "Black" and "Bat" are associated with the site.

The main feature is a structure which is sketched below.
