- E. SESSION SUMMARY

The target is a large progressive or modern structure. There may be stairs in the vicinity and this place has certain policies and procedures. There are some people at the site (men) in business apparel. Something is being watched or observed at this site and it appears to be a working environment. Someone is writing or jotting down notes. Communications are at the target site and plans may be made here. A theme or purpose for this structure appears to be new ideas, materials, or articles which are either produced or perhaps on display that may be considered a thought wave of the future. Some types of films or filming may be associated to possibly include tapes or sound tracks. There is a round object at the site and some sheets of metal. At one point, I perceived a green sign with the numbers 46 or 66 that is the size of a highway or interstate sign.
