STATEMENT OF WORK

FOR

PHENOMENOLOGICAL RESEARCH AND DEVELOPMENT

1.0. (S/NF) PURPOSE: The purpose of this effort is to continue basic and applications research in the field of psychoenergetics.

2.0. (S/NF) BACKGROUND:

SG1B 2.1. (S/NF) Over the past 15 years, DIA has followed the field of psychoenergetics for two basic reasons:

2.3. (S/NF) The GRILL FLAME project concluded in 1983 and a report with project findings was sent to congressional intelligence and appropriation committees. The report affirmed the existence of remote viewing phenomenon and recommended that additional research for quantifying and developing remote viewing as an intelligence collection tool be pursued. This recommendation was endorsed by a special Science Panel that met to review GRILL FLAME activities. This panel also affirmed that the SRI research was scientifically sound and urged that basic and applied research in psychoenergetics be continued, its scope expanded, and that other laboratories be involved.

CLASSIFIED BY: DIA/DT

SECRET

2.4. (S/NF) The first opportunity to expand psychoenergetics research scope occurred in 1985. The Department of Army's Surgeon General Office for Research and Development (DASGRD) initiated a 5-year research and development program with SRI International to pursue many of the recommendations from the GRILL FLAME report. The SGRD program centered on two main aspects: basic phenomena understanding, and application-oriented research. DIA established close ties with this R/D effort to insure that applications research would be adequately pursued.

2.5. (S/NF) In 1987, it became apparent that SGRD funding for this activity might not be available to carry through to the end of the 5-year period. Consequently, DIA made this situation known to various potential funding sources. The House Appropriations Committee (HAC) assisted in obtaining \$1 million in R/D funds in FY 1988 for DIA to continue this effort. A MIPR action to the existing SGRD contract is considered the most expeditious method of allocating this funding. The HAC also requested that these funds be distributed evenly between basic and applied or operational research.

3.0. (S/NF) OBJECTIVE: The objective of this program is to continue investigating and developing the most productive aspects of psychoenergetics as defined to date in the SRI research.

4.0. (S/NF) SCOPE: The basic scope of this effort will be to pursue areas of research that contribute to psychoenergetics phenomena understanding, and to conduct investigations that have the greatest potential for development of an intelligence application capability.

5.0. (S/NF) TECHNICAL CONSIDERATIONS:

5.1. (S/NF) All research activities and findings over the 15 years of SRI involvement in psychoenergetics shall be brought to bear on this effort. In addition, expertise in multidisciplinary areas throughout SRI shall be made available as consultants or for special support as required.

5.2. (U) Special support, if not available at SRI, can be obtained via SRI consultant or subcontract efforts with prior approval by the COTR.

5.3. (S/NF) This effort will utilize technical review groups, the Scientific Oversight Committee and the Human Use Review Board that has already been established by HQDA for psychoenergetics research under the original 5-year program (ref Enhanced Human Performance Investigations, DAMD17-85-C-5130).

SECRET

6.0. (S/NF) SPECIFIC TASKS:

6.1. (S/NF) Basic Research:

6.1.1. (S/NF) Reassess previous research and conduct new research to identify parameters and procedures that are responsible for remote viewing occurrence and for enhancing performance.

6.1.2. (S/NF) Identify optimum statistical evaluation methods and procedures and prepare appropriate handbooks.

6.1.3. (S/NF) Determine if select physiological parameters can be useful for identifying or predicting occurrence of psychoenergetic phenomena.

6.1.4. (S/NF) Perform various investigations that assist in identifying fundamental aspects of the phenomena.

6.2. (S/NF) Applications Research:

6.2.1. (S/NF) Develop quantification and evaluation techniques for a variety of operational types of targets.

6.2.2. (S/NF) Conduct multi-series remote viewing projects for special operational targets to determine levels of accuracy as a function of operational conditions such as distance, shielding, timing, other factors.

6.2.3. (S/NF) Review and analyze all operational related projects to identify possible operational limits or qualifiers.

6.2.4. (S/NF) Conduct screening of large candidate groups to identify people with high quality remote viewing and related (i.e., search) ability.

6.2.5. (S/NF) Initiate development of new application capability (i.e., search).

6.3. (U) Support:

6.3.1. (U) Project management

6.3.2. (U) Support for Science Oversight Committee (SOC)

6.3.3. (U) Support for Human Use Review Board

SECRET

6.3.4. (U) Computer support and maintenance

6.3.5. (U) Document preparation, administration

6.3.6. (U) Travel

7.0. (U) **Quick Reaction Capability (QRC):** The contractor will maintain a quick response capability and be prepared to respond in less than 24 hours to problems or unexpected demands for brief technical papers that may develop during the term of this effort.

8.0. (U) **ALLOCATION OF EFFORT:** The level of effort to be applied to each basic task should be approximately as follows:

<u>Task No.</u>	<u>Allocation of Effort/Funding</u>
6.1	40%
6.2	40%
6.3	20%

JUSTIFICATION FOR OTHER THAN FULL AND OPEN COMPETITION
WITH
SRI INTERNATIONAL

(S/NF) The Defense Intelligence Agency proposes to procure through the Virginia Contracting Activity, pursuant to the authority of 10 U S C 2304 (c) (1), services to perform phenomenological research and development in psychoenergetics. The estimated cost of the service is \$1,000,000.00. Procurement of the above by use of procurement procedures by other than full and open competition is necessary because:

- (1) (U) The contractor is uniquely qualified due to their 15 year history of successful research in this field;
- (2) (S/NF) The contractor has internationally recognized experts in this field who have direct access to most world-wide research activities on this topic;
- (3) (U) The contractor has an extensive multidisciplinary staff that can be available for consultation as the need arises;
- (4) (U) The contractor has an extensive classified data base which has comingled with both government and proprietary data that is essential for this contract;
- (5) (S/NF) It would require several years for a new contractor to achieve the present level of expertise and competence possessed by SRI International; this would create a serious delay in phenomena understanding, in applications development, and in understanding potential threat posed by similar foreign activities in this area.

PROJECT TITLE: Phenomenological Research and Development

SPONSOR: Dr. Jack Vorona, DIA/DT

REQUEST #: 330/ /

SG1J

MONITOR: [REDACTED] DIA/DT-ACO, [REDACTED] DIA/DT-5A

1. (S) BACKGROUND:

a. (S/NF) In 1985, the Department of Army's Surgeon General Office for Research and Development (DASGRD) initiated a 5-year psychoenergetics research and development program. Research identified for this effort centered on two aspects; basic psychoenergetics phenomena understanding, and applications oriented research. This SGRD program was in response to recommendations that followed from DIA's 3-year GRILL FLAME evaluation effort that examined the validity and threat potential of an aspect of psychoenergetics known as remote viewing. DIA established close ties with this SGRD research program to insure that applications research would be adequately pursued.

b. (S/NF) In 1987, it became apparent that SGRD funding might not be available to carry the project through to the end of the 5-year period. Consequently, additional funding was sought by DIA and acquired through funding transfer action by the House Appropriations Committee (HAC). This funding is now available in DIA. MIPR action to the existing SGRD contract is the most expeditious method of allocating these funds.

2. (S/NF) DESCRIPTION:

a. (S/NF) Expected Capability: This effort will permit both basic and applied research in psychoenergetics to continue. Tasks defined in the classified statement of work focus on those activities that have the highest potential payoff in both basic phenomena understanding and in achievement of new or improved application capability. Progress in both areas will ultimately assist DIA and the Intelligence Community in pursuing operational applications and in assessing the potential foreign threat in this area.

b. (U) Award Method: Sole Source

c. (U) Funding: Total effort is \$1,000,000.00; R&D, for FY 1989.

CLASSIFIED BY: DIA/DT

NOT RELEASABLE TO FOREIGN NATIONALS

3. (U) MISSION REQUIREMENT SUPPORTED:

a. **Source of Mission:** DCI Goal #2; DIP FY84-88 Required Capabilities li. 1n, 1q, 2a, 2e, 2g, 2j, 2n; DoD Plan for Intelligence Support to Operational Commanders FY84-88 Required Capabilities 20, 21, 23. NIT #9 & 32.

b. **Impact of Not Funding:** Failure to fund this effort would seriously degrade DIA's ability to assess military potential of the emerging foreign efforts in this field, and would eliminate potential for new application development.

4. (S/NF) CONTEXT:

a. (U) **Relationship to Ongoing or Proposed Projects:** This effort is contained in FY 88 line item 1.104 for Congressional Directed Programs. There are no known similar current or proposed projects.

b. (S/NF) **Managerial Persepctive:**

(1) (U) Responsive to PMGM 1984-1988 General Production Guidance II.B.2.a.

(2) (S/NF) A prior effort (1981-1983) concerning psychoenergetic phenomena was conducted under Project GRILL FLAME through a DIA contract with SRI International. The main purposes of GRILL FLAME were to evaluate the threat that foreign psychoenergetic achievements could pose to US national security and to explore the potential of psychoenergetic phenomena for use in US intelligence collection and military operational problems. GRILL FLAME included first-hand research and experimentation in the psychoenergetic phenomenon of remote viewing with the goal of attaining sufficient understanding of this phenomenon to permit an informed judgment as to whether to proceed in further study and application pursuits, or to abandon the area entirely. The results of this effort have confirmed the reality of the remote viewing phenomenon and the existence of a potential threat to US national security. GRILL FLAME also included assessments of foreign research in psychoenergetics.

c. (U) Is project in consonance with Agency ADP Planning? N/A.

d. (U) Government-furnished space: None.

5. (U) RESOURCE PROFILE:

	FISCAL PLANNING YEARS					ADD'L YEARS	TOTAL THRU FOC
	FY 87	FY 88	FY 89	FY 90	FY 91		
R&D FUNDS (\$K)	0	0	\$1,000	0	0	0	N/A

6. (U) COORDINATIONS: VP-SF, RTS, GC, OS, OC.

MIPR CONTROL PROVISIONS AND GUIDANCE

1. Funds cited may be used only for the project delineated in the classified Statement of Work (Enclosure 1).
2. The DIA estimate for this project is \$1,000,000 K over a 12 month period.
3. The total MIPR estimate shall not be exceeded by the purchasing office.
4. Changes in purpose, scope, or desired results from those delineated in the Statement of Work must have DIA approval. A copy of the final Statement of Work will be provided to DIA/DT-ACO for review prior to further contractual actions.
5. The MIPR should be addressed to:

US Army Medical Research and Development Command
ATTN: Jean V. Smith, SGRD-ACQ
Fort Detrick
Frederick, MD 21701-5012

6. Two copies of the final contract should be provided to:

Defense Intelligence Agency
ATTN: VP-SF
Washington, D.C. 20340-

Enclosure #5
