Summary of Information

The predominate color of the target is a deep, dark blue which almost verges on black in some areas. There is a whitish smoke, mist or fog associated with the dark blue and appears as if it were superimposed over the blue.

There is a sense of very fast movement associated with a lot of force or energy. Areas of the target are dark, damp, hollow, curved and/or smoothed and there is a soft feeling in some places.

From a distance, a feature appears as a clump fo dark green surrounded by beige. Both are very different from one another. However, this is not the main feature or aspect of the target as specified by the tasking.
