P: 91-4

Summary of Information

The target is a male that is old or elderly with dark stringy hair. He is a "grandfatherly" type and tends to look through, rather than at, objects. He is slumped down in a chair. He has military followers, is arrogant and ill-equipped for his job. He is incompetent in general and is brutal and sinister. There is, or has been, a transvestite associated in some way with this individual.

He is working with rumbled paper with a blue surface. The activity resembles a map with coordinates.

There is a mystical aspect to this individual. The concept of levitation somehow is associated with him. He has been pampered and spoiled.

There is a spoiled or stale food smell, apples and smoke associated with this individual. Also a kettle. There are juxtapositioned stripes, a radio playing a salty grease taste. There are slicing sounds, birds or sea birds and gravel or coarse sand. A very fragile glass-like object is present (see diagram).

There are a series of blue "V"'s and a long, narrow passageway. Ground or earth is very important.

Then a massive ADL overdrive of [REDACTED] which I have not been able to eliminate. In fact, my perception of him in my session was simultaneous with him calling the unit and speaking with [REDACTED] on the 25th of July.
