(Tasking data sheet attached)

Summary: Stage 3 movement exercises and stage 6 tools were employed to search for Terry Waite's present location. Attached is a xerox copy of the portion of the map where my data places him. He is inside a 4-5 story building on the west side of a very straight street which runs north-south. From a small upper window on the street side of the building, a captor can look southeast and almost see the very large stadium-type complex about several kilometers away. The area itself is fairly run-down; empty or partially occupied tenement type buildings abound (AOL-It reminds me of open parts of the Bronx or Queens).

Terry Waite is ~~occupied~~, between periods of ~~boredom~~, in ~~reviewing~~ or possibly ~~helping to draft~~, what seems to be a plan or similar document. My impression is that he is to be the ~~key proponent~~ of this plan upon ~~release~~. A release date, however, will not be set until the plan is ~~finalized~~ to the ~~satisfaction~~ of the captor's leaders (who are located somewhere else).
