#### SUMMARY OF INFORMATION

During this session, I could see an object on a platform. It looked like an up-graded canon. However, when I was in close view of the object, I could see that it was used to measure distances and that a man was looking through it. The object has a rather small panel board. Overall, this object was not too sophisticated. It is used for ground order of battle.

I then could see two men with rifles kneeling behind a rock. They were wearing red or maroon berets. They had dark hair and dark eyes. They looked young. They were watching something in front of them. Behind them, I could flight activity. There were two airplanes flying straight up to the sky. The airplanes were small.

Overall, I feel that people were here to look or search for something.
