2. Tasking: Encrypted coordinates. Instructions in stage 6 to draw notional diagrams for 6 vessels,

SG1A

3. Comments: OOE was monitor. OOA identified two of the six vessels as carrying contraband. is carrying the most,

4. Evaluation.

SG1A

5. Search evaluation.

The following refers to vessel [REDACTED]

16 Jul 90

See sketch of vessel (p. 10a) and location of contraband aboard vessel (p. 10b).

Contraband is contained within a black object * that is glossy, (like black enamel paint) w/ thin metal walls, & contains component parts. ~~Other~~ Remaining space inside allows storage of many small transparent vials which contain some sort of liquid and are sealed by rubber like stoppers or lids.

Black object seems to be more a part of the vessel, or belonging to the vessel rather than being any sort of cargo. But it is not necessarily permanently affixed.

SG1A

OF THE six vessels,

SG1A

Are carrying contraband, with  carrying the most. Attached is a summary and sketches for each vessel describing the location and description of the contraband

The Following Refers to Vessel [REDACTED]

16 Jul 90

See sketch of vessel (p. 10a) and location of contraband aboard vessel (p. 10b)

Contraband is contained within a black object * that is glossy, (like black enamel paint) w/ thin metal walls, + contains component parts. ~~Other~~ Remaining space inside allows storage of many small transparent vials which contain some sort of liquid and are sealed by rubber like stoppers or lids.

Black object seems to be more a part of the vessel, or belonging to the vessel rather than being any sort of cargo. But it is not necessarily permanently affixed.
