SUBJECT: SESSION SUMMARY (C/SS)

SG1J TO: DT-S (ATTN: [REDACTED])

1. (S-SS) Statistics: Viewer: 018
Session date: 11 APR 88
Start time: 1037
End time: 1116
Mode of operation: SOLO

2. (S-SS) Cueing:

- a. 6-digit encrypted coordinates.
- b. View and describe the target event.

3. (S-SS) Results:

a. The area around the event seems to be flat, with the actual event taking place on what appears to be a sloping area of ground. There were perceptions of tall buildings in the vicinity, and a large crowd of people. There was a passageway through the crowd which seemed to be somehow "Y" shaped (see drawing, bottom of page 3 of transcript and figure 1, attached).

b. At the time of the event, there seems to be some "boxy" object which is moving from the level portion of the area down onto the slope (see sketch, top of page 3 of transcript, and figure 2, attached).

c. The session was aborted due to a tremendously strong ADL drive of "Kennedy assassination" which would not go away, even after repeated breaks were taken.
