When I first came to the structure, I saw that it was full with many entrances and many windows. I felt that the men were building something new on to the structure. I felt there was a large round mirror placed on the ground facing the structure.

Upon entering, I sensed a lot of people entering & exiting. It was a gliding motion. Moving fast.

Floor 6 Location 4 - I

Saw a man in charge sitting at an expensive desk. He was sitting in between two pieces of expensive furniture. I felt that many men reported to him. He was a decision maker.

A tall thin man. I sensed a flag here. I sensed decorated hats ~~with~~ and ribbons.

The man here was high ranking. The people who reported to him were serious and conscientious. I sensed an object which was thin with gold loops on it laying out flat. The men who reported to him were the ones who went out & did the job. They had to analyze but when they reported back, the reports were straight forward & only factual. There was a special job these men did. They went out to a hot grassy area to

keep watch. This area consisted of structures which all looked alike but then for some reason the men ended up in a very expensive structure. These men did a watch job.

Floor 7 Location 4 - I sensed another man. He was shorter and physically stronger. He was not as high ranking as the man I just described, but he was very forceful. He sat behind a round desk. He was responsible for the movement of men. He needed to know and understand exact timing. He has to know the little things. There was a cabinet here. I sensed there were papers that were kept hidden, or separate from the regular filing system. These special papers said something about turning an object almost upside down and thought it was due to something but was not. I also sensed this man held a small case in his hand & he opens & locks it.

Location 11 - I sensed
men relaxing, taking
a break. Talking.

A group of men sitting down.
I felt I was watching
a movie at one point.

I kept perceiving audio: visual
or visual.

Then I sensed a man
half dressed, drinking water.
He had black hair. I
sensed a cooling down.

~~I sensed a fanning~~
I sensed a ~~lot~~ light
fan.

At one point, I felt
like I was in church.

This location was L-shaped
and I felt that this
was in an older section
of the structure. I
sensed water.

At one point, I felt
that I was in a bathroom.
