1356-

I first sensed a very large tall structure. It was thicker at the base. I sensed a part protruding from the side - an addition. I sensed curves along the sides of the structure going the opposite way.

I sensed people riding bikes, walking. I sensed a wall. I sensed water nearby used for recreational purposes.

I sensed a door of the structure that closed from the bottom up.

I sensed that ~~the~~ ~~structure~~ sometimes things were built all at different times.

I sensed a round top with a rubbing effect. I sensed a slightly bending down and pulling off.

I sensed a rather elaborate entrance and there was something artificial about the entrance. I sensed people entering with children. I sensed old men not moving.

Inside the structure ~~was~~ there ~~was~~ many sections.
