5 1/2 reminds of printing press

Impression of large open, windy, cool area with water nearby.
"large flat hard surface area "like" airtiled sort of place. Structures
nearby; one is metal tall, w/ angles in it. Other bldgs nearby,
one of interest. Inside it's dark, light, cool, warm, and has at
least one room that is lighted, has a "filing thing" in it &
a surface that is "like" a desk or table for spreading things
out on which has paper on it viz no cover.

part

5/4/72 impression that "things" come "in" from direction & be changed into more useable form - not fundamentally altered, just made "better" for purpose. "Like" analog signal coming in, being digitized, then being sent on in a more transmittable, accurate format.

or being connected over wide area involves numerous different "outposts" with people. Like a "network"

412 "Document" doesn't seem to belong to whom it used to. 2nd party from has it. Seems almost ~~as~~ a report of something that was being or is being done/produced elsewhere. Elsewhere is somewhere along way over our lot of water & land. "1104" almost on the other side of the globe in a relatively hard to access place. It's almost as if someone has scored some sort of coup by having this document/information in their possession.

1127
