

PROJECT: 8792 Approved For Release 2001/03/07 : CIA-RDP96-00789R000300140004-0 START: 0900

DATE: 17 FEB 87

SANCTUARY: \_\_\_\_\_

SESSION: 03

TARGET: 0905

SOURCE: 024

FINISH: \_\_\_\_\_

SG1A

COORDINATE: 

FRONTLOAD:

"WE will be going to the same target as last week; a building within a complex of buildings, larger rooms, an opening device for a roof..."

\* Some sporadic heater rifles due to chilly weather

NOTES:

- ① WEATHER cold, breezy, snow being predicted
- ② Source's mother successfully underwent surgery last week and is home and ambulatory
- ③ Source seems edgy and tense - Asking questions about other unit members etc.

DRAFT: \_\_\_\_\_

TYPING: \_\_\_\_\_

PROOF: \_\_\_\_\_

OPS: \_\_\_\_\_

SG1A

→

- ★ OVERHEAD VIEW OF A SQUARE WITH CROSSWALKS, building Alongs the sides, ONE building on A RIGHT HAND CORNER, domed shaped, AOL like WHAT AN 1600 WOULD LOOK LIKE
- STAY WITH THAT building
- ★ There are slits Along the top, perpendicular, A large building beside it
- TELL ME ABOUT The area AROUND This site
- ★ FEELING, ROUGH cold like concrete, steel girders, one wall, against one wall is like double doors, freight elevator comes to mind, from below ground level-up, fleeting image of a lot of electronic equipment
- Stay outside for a while, continue to describe the walls
- ★ Very tall, At the top They are small frosted windows that pivot to open, You can't look out because they are too far up. The walls are thick, steel panelling, steel plates, greyish, an area with a work table, slants like a drafting board, large sheet of paper, angles, numbers, "building plan" but that's not right, a schematic
- The domed shaped building
- ★ Doesn't seem to be a lot of activity at the ground level. Right now it's like an empty warehouse, trying to find some activity
- The other building move inside
- ★ Dark, There are people here, sitting at consoles, again it's like a round display, images on screen, like overhead pictures of the earth, you can see outlines of the continents.
- Move to the first console

3

- ★ Overhead view looks like either South America or Africa, ✓  
Think it might be South America, The console next to it had a lot of digits, like a graph,
- The next console
- ★ Europe from the Atlantic down to Mediterranean, all the way across
- The next console
- ★ a different kind of graph, lines across, digits down the side, a line that peaks then goes down then up
- The next console
- ★ Dark green, printing, like a computer screen printing out characters, across, then it clears and begins printing again, a lot the characters are numbers
- The next console
- ★ No more consoles
- move around the building on your own, find those areas of special interest begin reporting when you're ready.
- ★ There is a closed off room, people in it, there is a piece of equipment in it
- Tell me about the equipment
- ★ <sup>like</sup> TRIPOD, TRIPOD, with a camera flash attachment, a reflector, round, concave, backing, something coming out from the center, narrows, something like an antenna, it's on a platform, tall, taller than me, it can rotate 360°, and it can pivot 180°. Seems to pick up signals, seeks AOL Break antenna - seems to report to the console next to it, it

4

(continued)

- ★ turns in order to lock on to it, humph!! seems to be related to the room with the console. I can't tell if they are getting information from it or if they are directing -
- Continue to move around -
- ★ I'm NOT GETTING anymore images
- There are things that interest us in this building - focus on those things.
- ★ can't find any — Break for "pitstop" — (0934)
- Pause, relax further — 17 FEB 07, I want you to move ahead to a time when this facility is being utilized for the purpose for which it was built - Find the person who can help you to understand the purpose - Ask this person to give you the words that describe its function -
- ★ (0937 Re-target) a strong feeling of being a central point, from here directions are sent to other points, like a control facility sending things to other points in the distance, they keep track of things and when things need done they signal another point at a great distance to act, nothing specific, just directions - like command and control, always manned, always watching - has a very sterile quality to it, like AOL atmosphere you would find in laboratory, something like ~~that~~ very clean, its feel like still in testing stage
- ★ Pause, Relax --- ★ AOL like our NORAD, monitoring activity - all over the globe, AOL 1ST STRIKE offensive, control center, not getting much
- ★ ask the person to help
- ★ a lot of beeping sounds, there's a screen, overview, of European continent, dots, appear, there's a way affect, like a dot with a ray coming out, in other places there is a dot from it intensifies

5

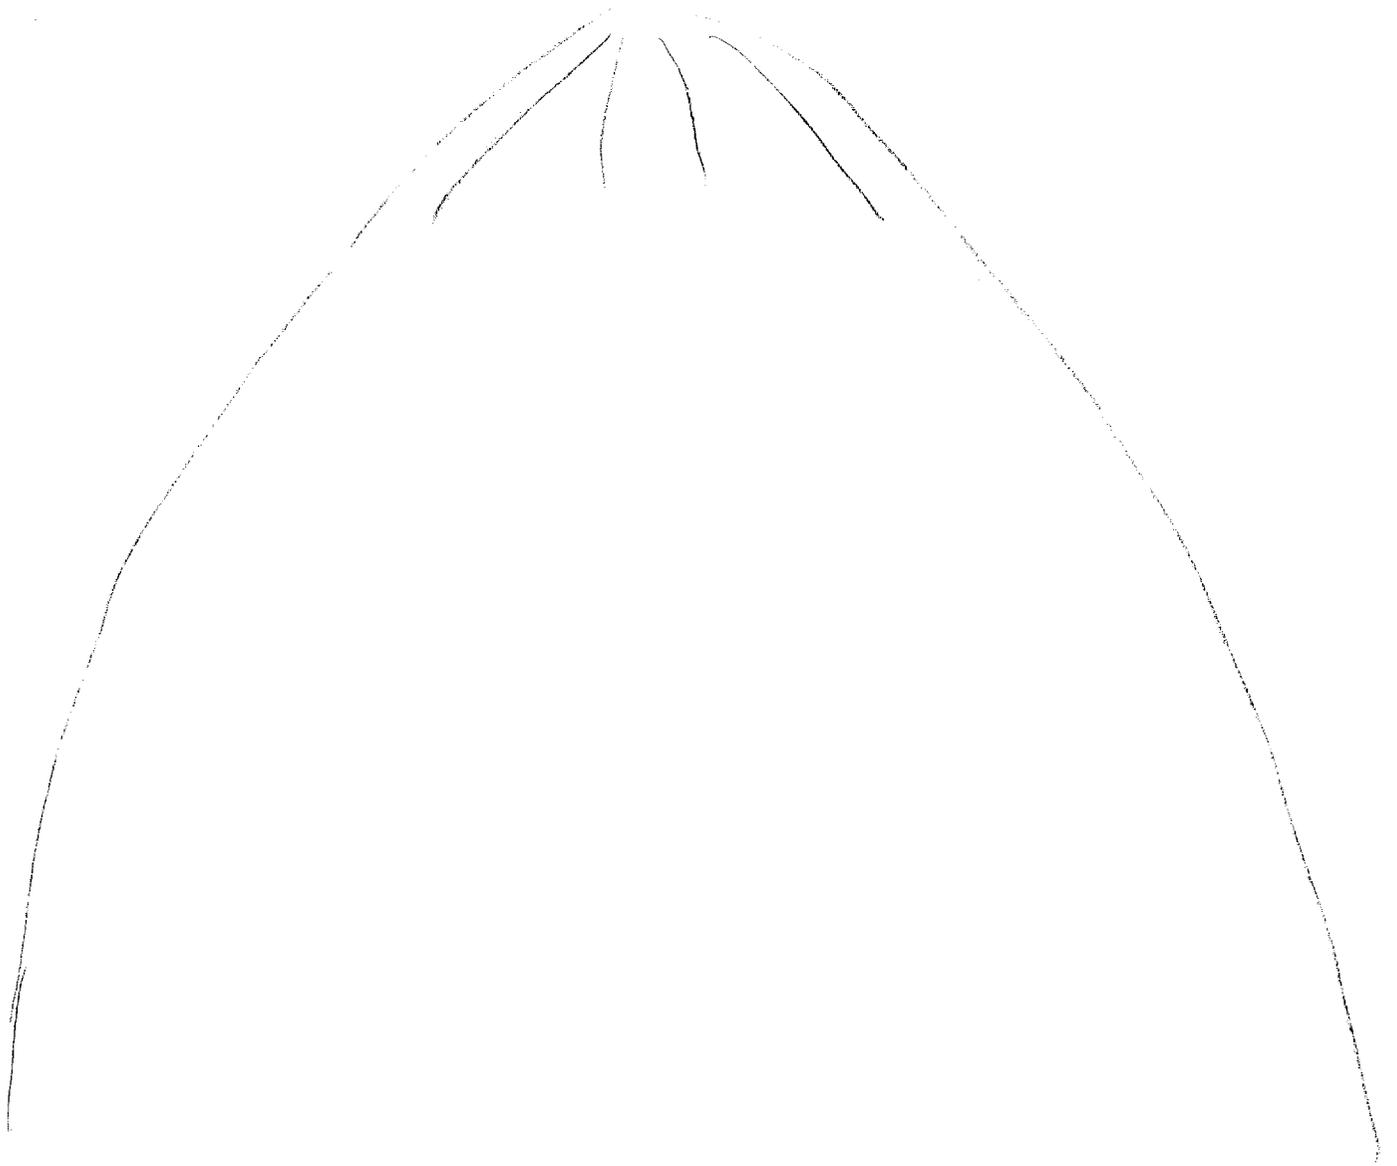

(continued)

- ★ Like one is pinpointing effect of being hit and the other showing where it was originated, like there are playing wargames, they are so totally unemotionally involved bizarre, I can't get away from the room with the consoles again, like a keyboard - somebody punches something into the keyboard and the whole screen changes - its like adjusting a camera, making things shrink or enlarge - like Star Trek, its weird, its got the quality to it - Science fiction type thing - what they are capable of doing - like its so much out of the realm of possibility at this point, its projected so far into the future -
- (overlay material)

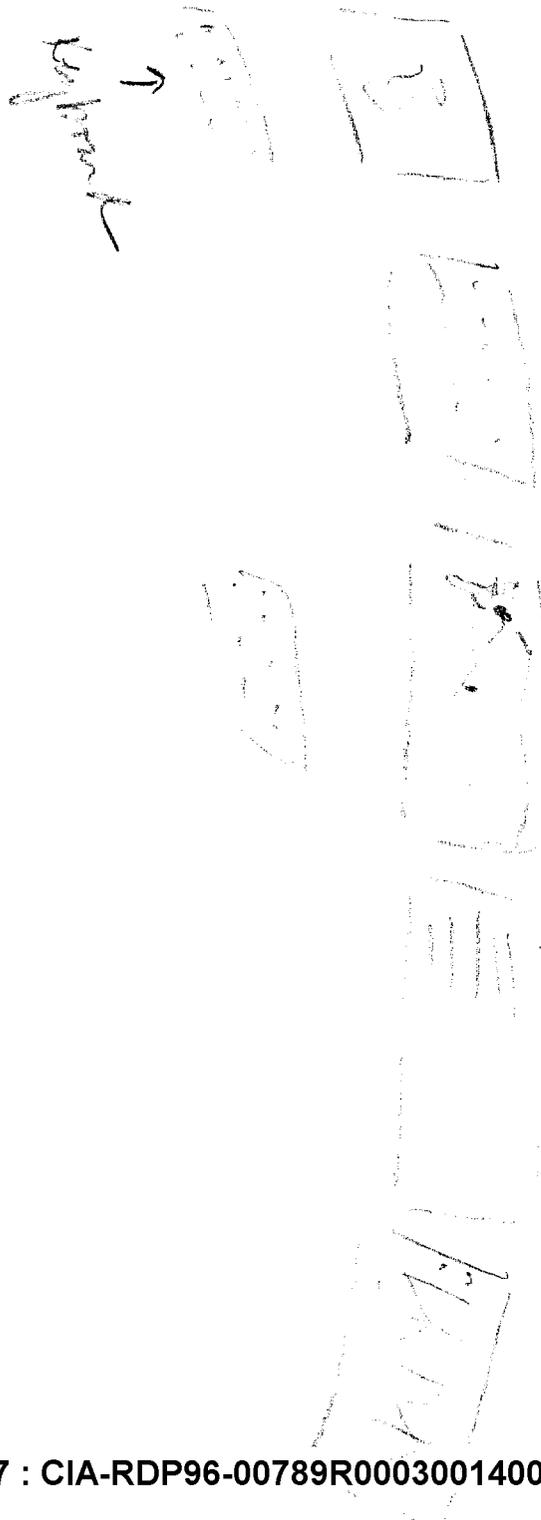

→ Pause - ~~recall~~ stay at that time period - recall other things - bright light, large rooms, oysterlike ceiling, describe these now

- ★ Domed ceiling, top of it, like teeth fitting into one another sky above when opened, there is a machine - tall, cylindrical, supports, raises out of opening in structure, tilted back as though it were aimed up into sky, at an angle, not straight, terrain is barren, rocky, there are mountains or tall hills in background, like an aura of a very intense white light around it AOL like - if you were looking at something in negative - very dark background - (you know what I mean - very concentrated, very compact, very specific amount of energy, very accurate AOL like a laser, not something you can see, it just is, sits up, dark w/ very clear sky, must be in isolated area because sky is so clear and corp →

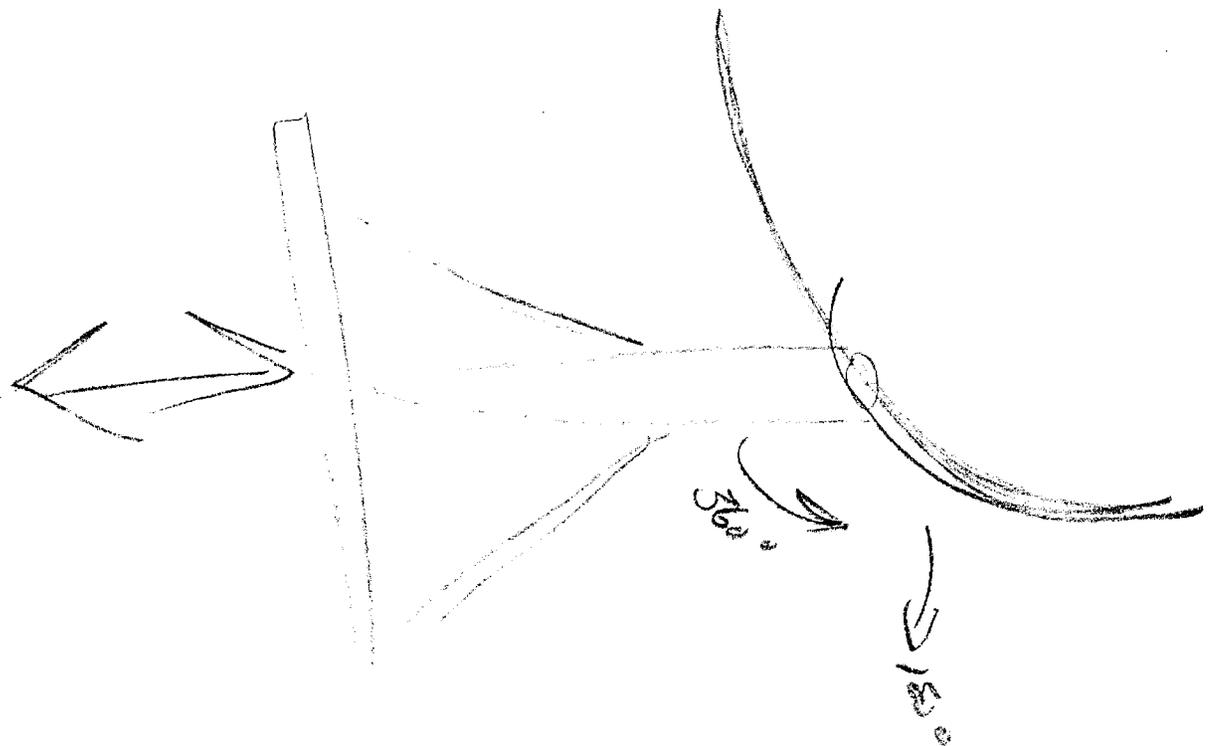

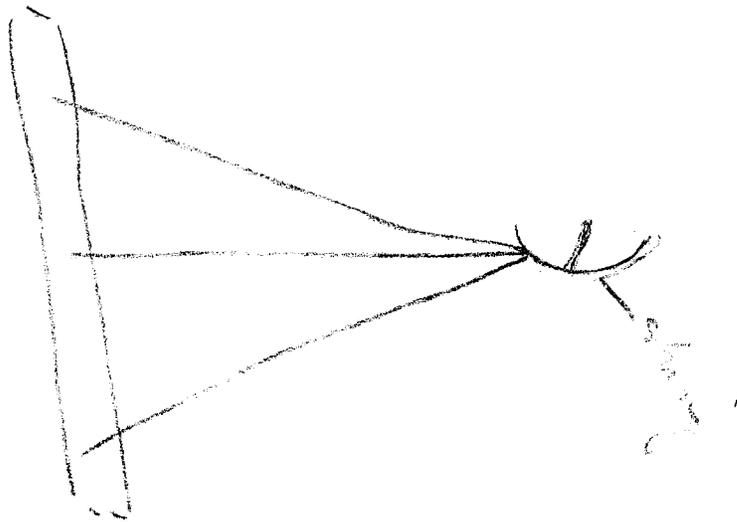

→ Pause - Go to your special place now

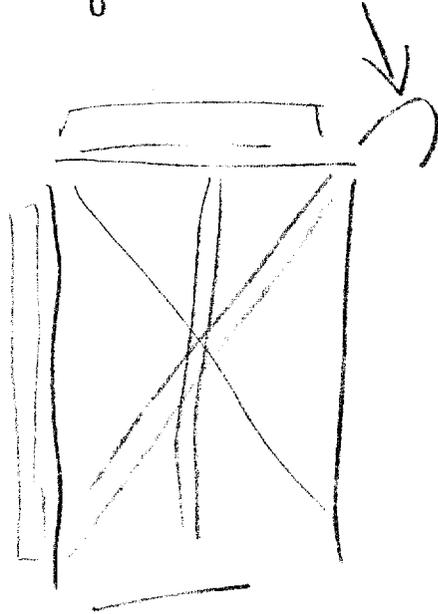

*handwritten*

Site is a complex of buildings on a square of land with intersecting crosswalks. There is a dome-shaped (like ADU, an agor) building in the upper right corner

This building has perpendicular slits at the top.

1. Large hall room with small frosted windows at the top of the wall (too high to look out). Windows frost. Ceiling is domed and steel girders are visible. On one side of room is a double sliding door ADU like in elevator. Room reminds me of an empty warehouse.
2. Large perim.-pound room with several consoles of screens & keyboards. Some screens display an ~~ADU~~ overhead view of the earth (various locations) ADU like satellite photography. Some screens display graphs, computer-like printouts and digits.
3. There is a piece of equipment that is like a tripod with a ~~ADU~~ concave shiny dish attached ADU like a camera flash. This is by itself in a room and is in some way "connected" to the console.

Agrees to the point of light (dots) some of these spread a predicted and when they appear while others just appear.

The room with the consoles has an experience of being a command/control situation. Are like a WOLAD type facility - only more of a first strike - first offensive situation.

5. Large room with high ceiling that goes on.

A cylindrical piece of equipment on a platform that can be raised or lowered as in the room. When raised to surface level, it can be perched directly 180° side to side & 360° around.

A bright glaring white light is associated with this. At one point it was like everything was in negative i.e. dark background and an area of 'bright light'.

Very strange. Very futuristic feeling associated with site.
