

SECRET/NOFORN

PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: S1 TNG SESSION NUMBER: 1
DATE OF SESSION: 880805 DATE OF REPORT: 880805
START: 0840 END: 0900
METHODOLOGY: CRV VIEWER IDENTIFIER: 32

1. (S/NF/SK) MISSION: Access and describe in a stage one sense training target # 67, Suez Canal.
2. (S/NF/SK) VIEWER TASKING: Encrypted coordinates 6731/3225.
3. (S/NF/SK) COMMENTS: Good job on a difficult stage 1 site. O32 was allowed to break structure on page 3. He was experiencing difficulty in describing a very complex ideogram, so he was allowed to break structure to illustrate to monitor what he was perceiving so that the monitor could explain to him, how to approach the decoding of such ideograms. This particular ideogram contained all the elements of the site: land, water and man-made 'structures' surrounded by the water.
4. (S/NF/SK) EVALUATION: 3.

BIBLE LANDS

Early heartland of civilization bares its anatomy to Astronauts James A. McDivitt and Edward H. White as they fly 115 miles above in Gemini 4. In Egypt's funnel-shaped delta—fleetingly taken by McDivitt for a giant lava flow—crowd 27,500,000 people, nourished by the splayed veins of the River Nile. Neither pilot could spot the Pyramids (left), near Cairo in the funnel's throat. Beyond Suez, the Sinai desert shows pale as bleached bone, while across the Israeli border in the Negev, left center, gardens bloom from the sands. In this 1,000-mile view, water—precious as blood—divides sere from sown. Such portraits from space give scientists a fresh look at world geography.
