SECRET/NOFORN

PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 0052

SESSION NUMBER: 1

DATE OF SESSION: 881222

DATE OF REPORT: 881223

START: 0815

END: 0930

METHODOLOGY: CRV

VIEWER IDENTIFIER: 032

1. (S/NF/SK) MISSION: Access and describe in training target #52 [REDACTED] SG1B

2. (S/NF/SK) VIEWER TASKING: Encrypted coordinates [REDACTED]

SG1A

3. (S/NF/SK) COMMENTS: The purpose of this session was to give 032 experience in using the "I" column. General concepts came easily to him, but anything detailed caused him to start to slip into ADL. Practice and experience will help overcome this. The next several sessions will be spent on targets that have lots of involved "I's" associated with them. 032's structure was good. He was not able to identify anything during the search exercise. His stage 7 was unsuccessful.

4. EVALUATION: 3. *pk*

SESSION SUMMARY
(Summ 13)

VIEWER #: 032
DATE: 21 AND 22 DEC 88
START TIME: 0935 21 DEC 88
END TIME: 0930 22 DEC 88

Site is a building situated amongst other buildings. The structure is fabricated of steel and concrete. There are aspects of the site that are appealing in design -- large curves and angles (AOL like shells) swooping up into points (see page 3,4,5). There are ramps and long hallways associated with the structure. There are also long heavy (AOL cable like) things that are hollow in the middle which run in what appears to be no significant sequence or direction.

Power is associated with the structure. It has the ability or mission to develop and concentrate power (AOL like lasers) for some purpose. The purpose is for study now but will most likely develop into some use in the near future. [REDACTED] and electrical power may both be associated with the site. The electric seems to be the work horse or maintenance power source while the other is more the subject of study (or is limited in it's use). There are objects present which seem to vibrate or attract like enormous magnetic fields or energy fields. These objects are not the center of attention but they are present.

There are people at the site that are technically oriented. They study and work with many different sciences all of which evolve around numerous objects of different design but similar function. They are intelligent and very intellectual. Their work habits include; planning learning, teaching and recording information received through their work.

[REDACTED] capability of tracking or following
[REDACTED] their function, intent and purpose.

The people at the site include military as well as civilian personnel. The facility seems to be government related (AOL like a defense installation).
