- E. SESSION SUMMARY:

The target consists of several block-shaped objects which appear to stand on end. They are situated in an arrangement that is reminiscent of a circle. They have a very heavy, rock-like feel to them. The area surrounding this arrangement is flat and gently rolling in places. This feature is soft and its coloration is consistent throughout the vicinity.

There are smaller objects scattered within the perimeter that the larger objects define. A few of the larger objects are connected across the top but not consistently. There is a single object which stands separate and appears to loom above the others. It has the appearance of a column but is not part of a structure per se. There is a convoluted figurine which sits on top of this taller object.

There is the feeling that there are small groups of people nearby. They seem to move en masse and follow some sort of predefined path or direction.
