- E. SESSION SUMMARY:

The target material was perceived as being politically oriented. Conceptually, there was also a strong agrarian aspect to the material.

The concept, not the color, "red" was strong and was associated with a leather-backed, old publication of European origin; maybe England. Feelings of hardness, metal and concrete associated with the words labor, workers and construction.

Concepts of storage, protection and cone-shaped objects as well as of "a relationship" between humans and their jobs or humans and the environment. Again, the concept of agrarian and "socialism within an agrarian society".

I perceived individuals working with the land and manipulation of the landscape.

hard, metal, concrete;  
labor, workers, construction

U/I object associated w/  
"working the land".

*The Once and Future Universe*

*With otherworldly eyes, the joint Smithsonian-University of Arizona Multiple Mirror Telescope (MMT) looks out from atop Mount Hopkins near Tucson. The telescope's six*

*72-inch mirrors, with resolving power equivalent to a single 272-inch mirror, were designed to be integrated by lasers. But moths fluttering on the evening breeze interrupted the beams. Now the images of cosmic objects are coordinated by a video system. The MMT is particularly suited to examine quasars, using their ancient light to probe the most distant margins of space and time.*
