St/2 Impression of glass "tube" with "filament" inside pulsing w/ light + energy

Interim Summary

Idea of that this "apparatus" is electro magnetic in nature that two types or variations of e.m. fields or forces are brought together to produce a third force - it is this 3^d force that they are trying to obtain + control. There's an idea of "beating" the 2 ~~var~~ fields together, to achieve some sort of "beat frequency".

Documents are many & come in "fide bundles" or "books".
 They are "working" documents & are continually being added to.
 They are full of drawings - "schematics" - wiring diagrams,
 detailed discussion of assembly & construction, as well as
 precautions & safety concerns - the people working on it
 make very sure of each step before going on to the next.
 There are numbers, tables, columns, "look-up" lists, with
 detailed directions for working with & on the apparatus.
 Conductivity is very important. If resistance in
 the system is too high, effects are degraded to the
 point they are useless or non-existent.

Paul Session # 4 , Project "N" - 3 June 1987

- ① Paul I want you to move into a Stage II Matrix and Stage 5 the coordinates themselves. Can you do that? " Yes. This could be interesting." 523887/688599
- ② "Did it work?" I don't know Paul but in your topics you mentioned Research - I would like you to do a Stage V of research - "ok"
- ③ - papers & documents - Stage 5 The papers and documents - you made reference to Document, Documented, papers etc. lets stage 5 that concept
- ④ "I have an impression of a device with two types of electromagnetic forces being brought together to create another different force" ok, give me that in an interim summary and then we will stage 5 the concept of documents, papers -
- ⑤ "I can't do both" ok Paul do Stage V on Documents.
- ⑥ Don't rush it Paul (Long delay - 5/12/87) - I'm going to re-cue because I know there is more here. (10) Acquired on 5/12/87.
- ⑦ ~~Can you~~ Do you think you can acquire anymore information on the documents? "no" ok please summarize your perceptions and we will terminate the session at this time -
