Bush

a large domed structure, patterned like
concrete blocks. The structure is isolated
or hidden. The people in the structure
are dark-skinned, hostile, and carrying
weapons. They lie in a very exposed
mode, planning an activity. There
is a large oval-floored room with
map & charts & communication equipment.
~~The people are carrying weapons. There~~

are smaller rooms in the structure,
some of which are used to store ammunition.

Brush

The person is located in an urban area with an Eastern European feeling. The area has many rough structures that are crumbly because of age and damage. The structure is "hidden" among other buildings and is thought to be unused. The windows are boarded up. There are shops and food stalls and street vendors near. Very poor area. Almost like what would be considered a slum area, although the rest of the area isn't that terrible. The better part of area about 3 miles — but it's all connected. There's a lot of white — predominantly the color of the buildings. Sunny, warm.
