I signed the papers detailing
the requested people to "Drill Flaming" for
18 months.

I'm not too happy about doing
that because they are out of luck and
it hurts the people we took them from.
I think 18 months was too long and if
people want the project they should give
some resources.

So - I don't know our milestones but
I would like to see you establish some
we had are we trying to do? - what is our
* time table? WAT I don't know so I want to
review in detail where we are - where we

are going and re-affirm the continued
need for the people we detailed to
the project.

where going
to do this?
Didn't Gale
Committee do this.

→ I want a formal review of the
program with conclusions and
recommendations for future involvement.

We are paying a good price in
terms of people and I want direction to
it.
