

SECRET

WORKING PAPER

SUMMARY OF INFORMATION

The air crash of the Pakistani military aircraft carrying President Zia Ul-Haq, US Ambassador Arnold Raphel, and BG Herbert Wasson on 17 August 1988, was not the result of foul play, an air attack or a bomb placed aboard ship. The explosion was caused by escaping fuel and vapor that exploded upon incineration.

Joseph Cicippio and Alann Steen have been transported to an area located immediately north of Israel at a location identified as "Marunm ar Ras." SEE ENCLOSURE 1. If they are not found soon, the "crazy" Shiites will dump them into Israeli territory. Both Cicippio and Steen are in a frightful, physical state, almost in a vegetable state of being. The abductors do not want the deaths or physical condition of Cicippio and Steen attributed to them; consequently they feel the best thing is to dump them anonymously into Israeli territory. Members of the Israeli Defense Force have ready access to this area and can retrieve Cicippio and Steen at no danger to themselves.

USMC LTC Higgins remains located in the immediate vicinity of "Khadah" (ENCLOSURE 2); this will be confirmed within the next two days when Higgins is released from captivity as a result of United Nations (UN) intervention (diplomatic endeavors). [The names of the Lebanese nationals suspected of providing the Hezbollah group with a tip-off that precipitated the abduction of LTC Higgins are needed if further information related to this problem is desired].

Terry Waite, Thomas Sutherland, and Terry Anderson are in the Beqaa Valley. Waite is located at Location 1 of ENCLOSURE 3; Anderson and Sutherland, who are aware of one another's presence are at Location 2 of ENCLOSURE 3; no one is currently being held at the so-called "Arab Ruins", Location 3 of ENCLOSURE 3. Frank Reed and Edward Tracy are currently located about 5 miles north of the "Military Barracks".

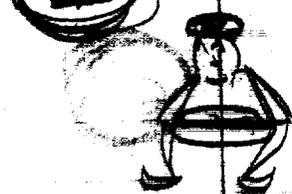

Robert Polhill is making a little progress although he is thoroughly confused as a result of the mental block he has encouraged to seclude himself from the reality of his captivity.

He now sits up and is able to eat. He is currently located in the "lower basement" of a brown "stinky adobe type house", a known/suspected safe haven (safehouse) located in area of "Ar Rawshah" and specifically in the immediate vicinity of "Fundug Karlun". SEE ENCLOSURE 4, [Map of Beirut]. There is a "Gas/Ethene/Butane" research laboratory located in the immediate vicinity. The laboratory has no significant, distinguishing features, but the building is known as described, a research lab.

Building 156, ENCLOSURE 4, is the Yugoslavian Embassy; they are not truthful and do not wish to assist in this endeavor; the information they provide is not credible.
