

Project "M"

Interviewer/Monitor Tasking

Describe the vehicle(s)

182478  
836131

Note: In the envelope are photos, sketches and descriptions.

Ops Note: Expand on viewer's description as much as possible. Explain the vehicle(s).

5+1/2 caged lights; fixtures; brackets; pioneer tools; vehicle set up for ops  
under ~~factory~~ ~~type~~ ~~type~~ conditions if necessary:

Arms, cones, etc. made for function not appearance. Attempts are made to shield it from observation from above, + it is made to look like something other than it is if seen from the ground. It is kept at a distance from all but those closely associated with it to avoid possibility of close ~~the~~ inspection by those unauthorized. It is not intended for extensive movement. It goes where it's needed, then stays in place while operating. Contains lots of equipment - mostly electronic in nature. Part of its purpose requires communications, initiating, monitoring + plotting. Vehicle seems to be involved with some sort of activity involving a sudden intense "very low brass," with associated loud, continuous sound + vibrations. Vehicle + source of "flash" are "remoted".
