x = delivery points

∴ Vehicle seems to move from point to point along a
route of pre-planned route "dropping off" a "delivering"
something of interest. Objects "delivered" are metal, rounded,
long, + contain both liquid + solid materials which
don't mix. Yellow is associated with objects

Route seems to be closed - i.e. terminated by its origination
point, almost as if objective is to enclose certain area of
terrain. Route goes uphill + down hills, across water, etc.

terrain is tundra/prairie, but with ^{low} vegetation + trees
scattered here + there;
