TO: DT-S (ATTN: )

1. (S-SS) Statistics:	Viewer:	018
	Session date:	17 MAY 88
	Start time:	1357
	End time:	1437
	Mode of operation:	SOLO
	PI:	Hungry
	AV:	None

2. (S-SS) Cuing: View and describe LTC Higgin's present conditions and circumstances.

3. (S-SS) Results:

a. Higgins is alive.

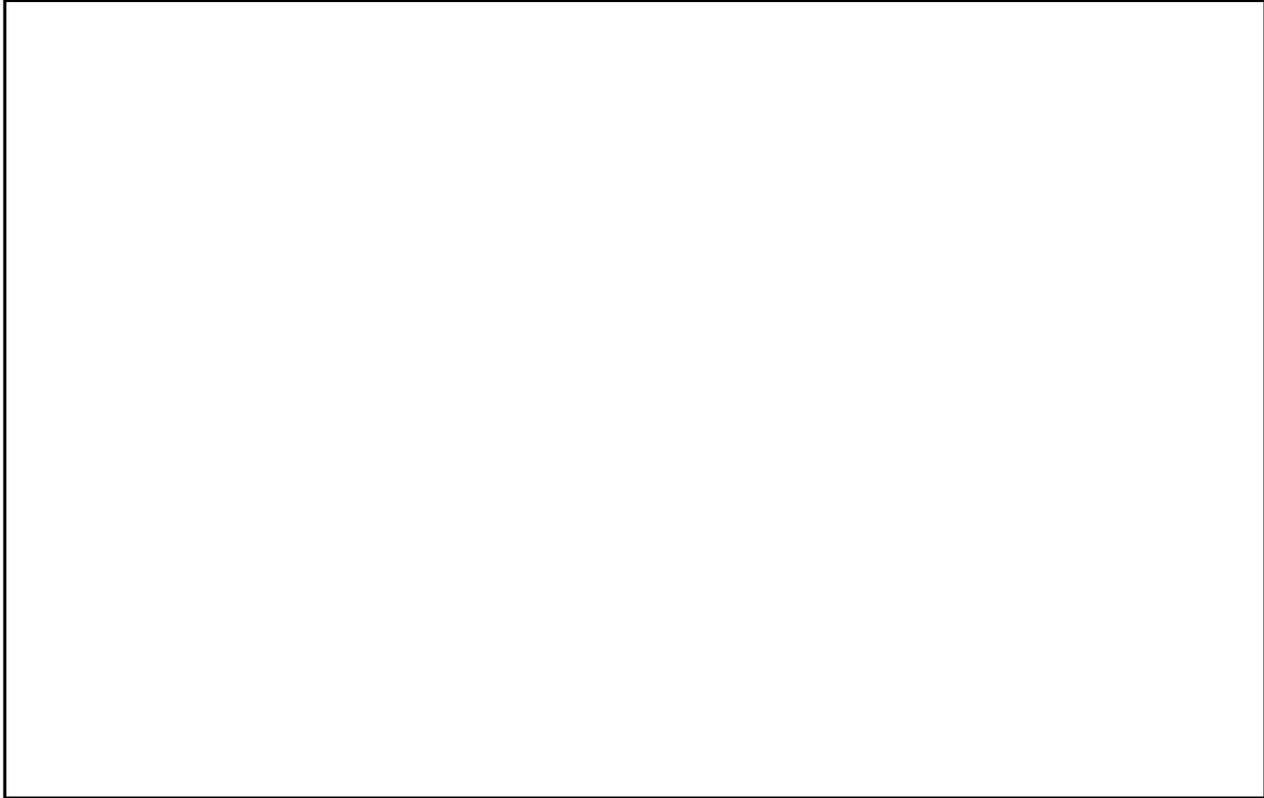

b. His general area appears to be in one of a close community of houses, distinguished by being the 4th structure from a structure which has some strange, U/I, tall, curved "thing" rising above it (see S3 sketch, page 3 and AOL sketch, bottom of page 5). This specific building is white, smooth and round cornered, whereas the surrounding houses (and the one Higgins is in) are much darker in color and have a much rougher texture.

c. Higgins is in a room with two "guards". He is sitting in a semi-fetal position without back support on a raised area (AOL: a bed) which has a yellowish cloth covering. He has a headache, and is trying to ignore the very tinny and loud noise which surrounds him. There is a window in the room through which he can see only green foliage. This green foliage is his "crutch" which lets him hold on to reality, but he is aware that, if he gets caught looking at it, it will be taken away from him. He therefore is very mindful of his guards watchful eye, and will only allow himself to look at the green foliage peripherally.

d. One of the "guards" stands watch by the door and

seems to be armed. The other is sitting with his side/back to Higgins, as though ignoring him, but is very mindful of Higgins' every move. Higgins is aware of this, even though he isn't supposed to be.
