WORKING PAPER

Project: 9002-C  
Date: 900222  
Time: 0838-0923  
Viewer: 018  
Session: 01

SUMMARY OF INFORMATION:

1. (S/NF/SK) Provide an overhead focus of the target structure: The structure appears to be built with a portion of its base on sloping ground (see Fig. 1). The entire area is dense in very beautiful and thick foliage. The valley below the house is also thick in vegetation. There is a separate building, much smaller, which appears to be for cars. There was also a perception of a "dock" nearby where a sailboat was tied. This sailboat has a hidden compartment directly behind the base of the main mast which contains a box with a great deal of money inside.

2. (S/NF/SK) Describe the interior of the target structure: Perceptions of this portion were very few (see note, below). There was a sense of unusual design concerning the living room, in that it is walled in on all sides, but is designed in an "L" shape, with stairs leading down and out of the room in the inside corner of the "L" (see Fig. 2).

NOTE: This session was done while under heavy doses of antihistamines from the doctor. During the entire time of the session, a great deal of time and effort was expended trying to stay awake. This definitely got in the way of the viewing.
