

Gale Report:

1. Security Classification Guide : para 3 - we should recommend that SRI get copy.

3. Take exception to para C, page 4
4. Page 5 para 2B : we don't always tell analysts source of info → what happens when he (analyst) tells me it is correct!!

- ① Reaction report from committee

Wynne & Del Del  
AMSAA: Knocked them for things  
but originally had been  
briefed & are being changed!

Dr Yang - assistant

DR YORE: was putting stop to AMSAA  
MIA

AF: Not even mentioned  
in Report - How can  
Report be DoD effort, in this case.

Overall:

KCN

1. Committee not objective nor unbiased
2. Report Adds nothing
3. Scientific Issue
4. SRI - guidelines changed  
- never carried through on certain  
steps in process - varied techniques
5. Did not use all info made available  
to them.

---

Concerned that main reader  
would draw wrong conclusions  
& terminate program / basic  
research in area.

If there is only  
one thing I can say  
about this report I  
would chose to talk about  
paragraph 2d, ANNEX 8  
page 70.

The comment  
shows a blatant disregard  
for the obvious facts. The  
author is clearly not playing  
with a full deck.
