WORKING PAPER

Project: 9012  
Date: 900403  
Time: 0927-1005  
Viewer: 018  
Session: 01

SUMMARY OF INFORMATION:

SG1A

1. (S/STD) Determine if the [ ] is indeed carrying contraband narcotics: Yes. Two "types" or "portions" of narcotics were detected:
  - a. There appear to be people on board (both males and females) who are using drugs "recreationally" at the time of the viewing session.
  - b. A stash of "cargo" drugs (see item 3 below for location).
2. (S/STD) Determine the current location of the vessel: At the time of the session (0950 hrs., 3 APR 90) the vessel was located through several attempts to be in the general area of 44 degrees N/10 degrees W (see Fig. 1, Map, for X-marks).
3. (S/STD) Where is the narcotics contraband located aboard the vessel?: The "cargo" drugs appear to be located slightly forward and approx. half-way up the structure of the ship (see sketch, Fig. 2). They are located under the flooring. The particular portion of the flooring appears to also have a raised flooring over it, made of thin wooden strips (like the raised flooring behind a butcher-store counter or restaurant kitchen).
4. (S/STD) Where will the off-loading/transfer of the narcotics take place?: Present projected location appears to be the southwestern coast of France (see Fig. 1, Map, for O-marks).
