PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8810 SESSION NUMBER: 1
DATE OF SESSION: 3 JUN 88 DATE OF REPORT: 3 JUN 88
START: 1315 END: 1400
METHODOLOGY: CRV VIEWER IDENTIFIER: 095

1. (S/NF/SK) MISSION: Fix and describe the location of Terry Waite.
2. (S/NF/SK) VIEWER TASKING: Coordinates 780701/324843. 095 was prebriefed regarding the task and was permitted to use the viewing methodology of choice.

3. (S/NF/SK) COMMENTS: Tight control of structure on the part of viewer and monitor was maintained throughout the session. Stages 1 - 3 (including movement exercises to obtain various perspectives) concentrated upon a perceived structure. Stage 6 was employed for a 360 degree sweep, using the key structure as an anchor point, to orient the viewer with respect to terrain in preparation for an area sketch. After completing a wide area sketch, 095 dowsed a randomly oriented, clear acetate overlay which was keyed to a map of Beirut. After locating the target, the monitor removed the overlay and replaced it with the Beirut map. 095 was directed to review the earlier (Stage 6) wide area sketch and to attempt to determine the location of the key structure. This accomplished, both monitor and viewer proceeded compare the dowsing results with the analytical (map search) results. Both locations were within one square inch (about the area of a quarter) of each other.

[Refer to sketches and inclosure] 095 locates a key structure (associated with the target person) at (center of mass) 33 degrees 50 minutes 40 seconds North/35 degrees 30 minutes 50 seconds East.

4. (S/NF/SK) EVALUATION: []

Session Summary

Viewer: 095

3 June 1988

CRV

Start: 1315

End: 1400

Associated with the target is a structure the curves up, over and down as well as around. The top part is golden brown. There is a pattern of small squarish/ diamond shaped pattern all over it. Around it is a ridged edge. Right below the ridged edge are some wavy shaped indentations (see drawing).
