NAME OF INTELLIGENCE COMMITTEE  
 FY 1994 GDIP BUDGET  
 May 12, 1993

93

QUESTION AREA: Production (U)

QUESTION #: 40 The STARGATE project has been under DIA study during the last year. What is the status of this effort? Does management and execution reside with DIA or AFMIC? What is STAR GATE's resource profile in terms of funds and personnel for the period FY1980-94? (S)

ANSWER: Management and execution of STAR GATE resides with DIA. A staff study completed in December 1992 recommended that STAR GATE be transferred to the AFMIC facility at Ft Detrick, Maryland. Even if this transfer occurs, management and execution will continue to be done in DIA. STAR GATE is pursuing all of the Congressionally directed objectives identified in FY 1991, FY 1992, and FY 1993; including foreign assessment, external research and in-house investigations in anomalous phenomena. (S)

SG1  
A

--R&D funding received in FY 1992 is on-line with research/support objectives underway;

--In-house activity, consisting of application and proficiency projects, including trend analysis and exploration of various technologies is continuing.

Since FY 1980 DIA manpower devoted to STAR GATE has remained constant. During the same period other O&M and R&D dollars provided by various sources fluctuated. (S)

FY YEAR	Manpower	other O&M/R&D	Remarks
--FY 1980	10 billets	\$450K	
--FY 1981	"	\$250k	
--FY 1982	"	\$175k

2. (S) CONF TASK: Class Annex, Joint Ex, Encl 13 Action: GDIP

STARGATE: The conferees are concerned that insufficient funds have been spent on research and development to establish the scientific basis for the STARGATE program. The conferees direct the Director of DIA to prepare a program plan and to submit an appropriate budget request for a research effort, over several years, to determine whether the STARGATE program can show results that are cost-effective and satisfy reasonable performance criteria. This plan, and any research under this program, should be subject to peer review by neutral scientific experts. The Director of DIA is directed to prepare this research and peer review plan within existing program funds.
