

In conclusion, it was the opinion of Dr. Spink that little was gained by attendance at the meeting. The results were negative in the sense that it was confirmed, as Dr. Spink already believed, that Drs. Lindell and Hillings had not studied the literature and the evidence and, hence, were not qualified to speak with authority on the subject of recent sightings of unidentified aerial phenomena.

An attempt to arrange a meeting by Dr. Spink with Dr. Neesbitt, Dr. Lindell, and Dr. Hillings after the meeting was over, was unsuccessful because Lindell and Hillings both had to leave immediately after the meeting.

INTERCOMPARISON FORMS

Five hundred copies of the "U. S. Air Force Technical Information Sheet" (Form A and Form B) were delivered to WAFB on October 20, 1951. This questionnaire was used in place of the "Executive Observer Data Sheet" to record data on all sighting reports dated after March 30, 1951. It has proved to be more satisfactory than the previous form, especially from the standpoint of recording data from sighting reports in greater detail.

Additional copies of the "U. S. Air Force Technical Information Sheet" can be supplied to WAFB as needed.

DATA WORK

Coding and evaluation of 1951 sighting reports will continue. A preliminary analysis of data on all sighting reports dated previous to 1952 will be given to WAFB as soon as possible after evaluation is completed of the 1947 and 1948 sighting reports.
