Dear Sir

On the eve of October while
my sister and I were put for a walk
we saw something in the sky like a comet
at first it resembled a plane, as we could hear
the sound of engines, but when it began
at attention but suddenly we saw the
flame lights but they were in the sky
kept on moving. The object kept a moving
till it reached the star horizon then
it disappeared. I saw your advertisement
in a newspaper and I thought
right so will tell you about it
Yours sincerely

Dr. M. H. (11)
