

CONCLUSIONS

To date, the firm conclusions of Project Blue Book are: (I) no unidentified flying object reported, investigated, and evaluated by the Air Force has ever given any indication of threat to our national security; (2) there has been no evidence submitted to or discovered by the Air Force that sightings reported by unidentified reported technological developments or principles beyond the range of present day scientific knowledge; and (3) there has been no evidence indicating that sightings categorized as unidentified are extraterrestrial vehicles.

The Air Force will continue to investigate all reports of unusual aerial phenomena over the United States. The services of good West scientists and technicians will continue to be used to investigate and analyze these reports, and periodic reports on the subject will be made.

The Air Force takes no stand on whether or not extraterrestrial life exists or does exist. Scientifically, it is entirely possible that the universe contains life on planets other than our own. ^(The Air Force has no interest in) It is not the Air Force's policy to hold an open invitation to anyone to submit to the Air Force any evidence of extraterrestrial vehicles operating within the earth's orbit, space coverage to submit any evidence for analysis. Initial contact for this purpose is through the following address:

PROJECT BLUE BOOK INFORMATION OFFICE
SPACE
WASHINGTON, D.C. 20330

Anyone observing what he considers to be an unidentified flying object should report it to the nearest Air Force Base. Persons submitting a UFO report to the Air Force are free to discuss any aspect of the report with anyone. The Air Force does not seek to limit discussion on such reports and does not withhold or censor any information pertaining to this unidentified program.

Based on data the existence of only one planet outside our solar system - Kepler's planet - has been demonstrated. No evidence yet exists that there is other life. The Air Force continues,.....etc.
