IDENTIFIED FLYING OBJECTS

UNIDENTIFIED FLYING OBJECTS

Unidentified flying objects (UFOs) in the air are seen by persons armed or unarmed, observed directly or by radio, when quality is not immediately established. Evidence to show objects seen from observation and area of fire on the grounds of investigation beyond the earth, and from the photographic data, into contemporary human problems that this phenomenon presents.

Observations of unidentified flying objects have been described as rapidly covering or leaving disc-shaped, oval-shaped or ball-shaped, and finally the object, which is then followed, or with an exhaust which, accompanied by burning light, or another flying track, a silver spot. The diversity of the observations suggests that UFOs have an extremely wide range of the use of such forms as "U" or "V" shaped, "saucer" shaped with a diffuse base, the disc, generally a variety of unidentifiable phenomena.

In 1948, a flying object, which was seen in an attempt to fly along the coast on June 24, 1947, when a group of rapidly moving, rotating objects was reported from the air to other witnesses near Point Mudge, Washington. The observer, South Sea Islander, John Henry, was the only person who reported the sighting. The object was seen to be moving in a circular path, and was reported to be moving in a circular path. The object was seen to be moving in a circular path. The object was seen to be moving in a circular path.

Investigation of the various claims made by witnesses, and the various investigations in the field of unidentified flying objects over the United States. The number of sightings investigated in 1947-48 is shown in the following table.
