

objects flew in a straight line except for some changes in direction accomplished in a manner like any standard aircraft maneuver.

The objects were shaped like conventional aircraft. The unaccountable feature of the objects was that each had a red glow surrounding it and was glowing itself, although it was a cloudless night.

Case III (Script 2013.00, 2014.00, and 2014.01)

Two tower operators sighted a light over a city airport at 1820 hours on January 28, 1951. Since a commercial plane was taking off on this time, the pilots were asked to investigate this light. They observed it at 2014 hours. According to them, it flew ahead of them at a greater radius as they made their climbing turn, during which time it blinked some lights which looked like running lights. While the observing plane was still in its climbing turn, the object made a turn toward the plane and flew across its nose. As the two men turned their heads to watch it, it instantly appeared on their other side flying in the same direction as they were flying, and then in 2 or 3 seconds it slipped under them, and they did not see it again. Total time of the observation was not stated. In appearance, it was like an airplane with a cigar-shaped body and straight wings, somewhat larger than a B-29. No engine nacelles were observed on the wings.
