

Case V (Serial 9566, 00 to 0144, 03)

A pilot and copilot were flying a B-3 at 0140 hours on July 24, 1948, when they saw an object coming toward them. It passed to the right and slightly above them, at which time it went into a steep climb and was lost from sight in some clouds. Duration of the observation was about 30 seconds. One passenger was able to catch a flash of light as the object passed. The object seemed powered by rocket or jet engines showing a trail of fire some 50 feet to the rear of the object. The object had no wings or other protrusion and had two rows of lighted windows.
