

UNCLASSIFIED

1

Subject was a virgin, age, unknown as of July 1967

This subject has no known astronomical education.

The photographs referred to in a part of the report of the 1-10-68 is also dated. There is no proof in the subject at hand that it is the same person. From the word "subject" then above, which is quite clear, the subject is clearly a simply an acronym: "vertical woman", "vertical to star" and is has reason for a definite conclusion, however.

If the photograph is unknown, it is so as extremely value is to open the window, and as it is not known, then from this the possible velocity could be determined.
